PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with a strong interest in **programming and problem-solving**, backed by solid foundations in **DSA and core computer science concepts**. Experienced in building **full-stack applications** and quick to **learn, adapt, and collaborate**.

EDUCATION

Vidyavardhaka College of Engineering, <i>B.E. – Information Science & Engineering</i> ↗ CGPA : 8.58	09/2023 – Present Mysuru
Vijaya Vittala PU College, Class XII – PU Board Percentage : 87.33%	10/2021 – 03/2023 Mysuru
VVS BM SRI EI, Class X – CBSE Percentage : 91.8%	06/2008 – 03/2021 Mysuru

SKILLS

Languages — Java • JavaScript • Python

Technical Skills — Data Structures • Algorithms • OOPS • OS • CN • SQL

Tools & Technologies — Git • GitHub • REST APIs

PROJECTS

Vaultify – Zero-Knowledge Password Manager (Live Demo) [↗](#)

- Built a **zero-knowledge password management system** ensuring credentials remain inaccessible to the service provider.
- Implemented **client-side AES encryption** with master-key-based decryption for secure storage.
- Developed secure backend services using **Node.js and PostgreSQL** with authentication and access control.

FairBid – Real-Time Auction Platform [↗](#)

- Developed a **real-time auction platform** focused on fairness and transparent bidding.
- Implemented **role-based authentication** for buyers and sellers with live bid updates.
- Added logic to **prevent seller self-bidding and artificial bid inflation**.

FlowGuard – Rate Limiting System [↗](#)

- Implemented a **rate limiting system** using the Token Bucket algorithm to control request flow per user.
- Designed **O(1)** request validation with efficient token refill and eviction logic.
- Applied time-based request throttling to handle burst traffic while maintaining consistent request limits.

ACTIVITIES & PARTICIPATION

- **Team Lead, VVCE Infathon** — led a **team of 4**, coordinated problem-solving and development efforts.
- Actively engaged in **problem-solving and backend-focused application development**.
- Solved 270+ Data Structures & Algorithms problems across various topics.
- Focused on continuous improvement in problem-solving and core computer science fundamentals.
